QUICK START GUIDE

Welcome to Plus. Here's where to start.

Your upgrade unlocks the Ticketing Widget, custom Audience Segments, and unlimited Plays. These three steps put them to work.

2 min
to create and activate a Play

Once your segments are ready, Plays send targeted emails for you automatically.

What you'll need

- Your OTS login
- Access to edit your school's website, or the person who manages it

Your first three steps

1. **Embed the Ticketing Widget**
   Let families buy tickets right from your school's website. Go to Website › Widget Configuration › Settings.

2. **Build a custom Audience Segment**
   Group families and community members by shared traits, like who came to a past performance. Go to Patron Management › Segmentation › Create New Segment.

3. **Activate more Plays**
   Plus removes the two-Play limit, so you can keep families in the loop all year. Click Marketing › Playbook.
